

5th Course, 5th Class

Thursday, April 6

1. Review schedule of classes.
2. Review what we learned about Forecasting and the continue forward. I will answer your questions as we get back on track with VA Forecasting.

We interpret transits in Vicky's timeline format in the first hour. In the second hour we pick a date for Angela to have a business opening event. After picking the date, we look at the chart of her business partner as well, and we find that the date we picked is excellent.
