

## 2nd Course, 3rd Class

Monday, April 17

1. Schedule, homework.
2. Add about 5 minutes to each class through end of April.
3. 15-Minute Consultations at next VA Conference.  
Speaking at future ones if you are interested in research.
4. Research and software development. My teaching will mostly be youtube videos. New youtube memberships.
5. Fluency with software. Also, 2 default chart wheels.

### **Astrology software:**

1. Enter chart data
2. Select charts derived from the natal:  
Progressed, returns, vibrational charts, etc.
3. Select information (report) for ANY of these charts.
4. Quickly return back to any chart selected.
5. Other things: animate chart, research, etc.
6. Easily customize anything desired.
7. Do all this in Hellenistic, Medieval, Huber,  
Vibrational etc. with a huge number of options.  
This changes program design possibilities.

The task of achieving these 7 goals is largely up to the designers of the software and not PC vs Mac. If on mobile, has to fit on smaller screen nicely. If online, needs to

function like a laptop program.

**6.** The easy way to interpret!!!! Build the sentence with keywords that are always correct. Then try to feel it and sometimes an image can come to mind of how all of this comes together. Remember that interpretations are usually very specific.

**7.** The other big key: pick out about 4 or 5 main planetary configurations!

**8.** Planetary pairs: start with Moon-Uranus ( we did not get to this)
