

## 2nd Course, 2nd Class

Monday, April 3

1. Schedule, homework.
2. Add about 5 minutes to each class through end of April.
3. The book: *Vibrational Astrology, The Essentials*, to look up 3-planet and 4-planet meanings.

Alternative: File harasp01.txt

4. Theory of why Neptune inclines to illness at the end of the last class: (1) Consulting experience is that Neptune can be weak, prone to illness, spacey, psychic, (2) Database research is that Uranus-Neptune shows up with a wild imagination or vision, but Neptune does not weaken the greatest athletes of all time.

For example, 7 years ago I googled "greatest athletes of all time". I found 2 websites that listed the greatest athletes of all time, with about 25 to 50 athletes on each site and almost all of the 25 people on one site were in the list of greatest 50 athletes on a different site. The method for identifying the greatest athletes was given so it appears that one site did not directly copy the other. I entered their birth data and found that 14 of these athletes have AA data. The challenge: Is there something that stands out for these people. I looked at zodiac signs, house placements, and Ptolemaic aspects, but could not find consistent themes; a more thorough analysis might show

something. I found that very consistently any planet except Moon Venus or Neptune is likely to be aspected to each other in 7V or 35V charts! It is not uncommon for Neptune to be involved, and it appears that Moon, Venus and Neptune are slightly helpful. Neptune appears to incline the athlete to not only excel but also to become a kind of icon or image of an athletic super power.

There is a series of 9 videos about what was found in the charts of these athletes. Here is a link to the first video in this series, in case you are interested in watching these videos: <https://youtu.be/rYoIAiwTIIA>

**How do we reconcile what we see with clients with what we see in the database? A possibility is the evidence that our attitudes, thoughts and feelings have ENORMOUS importance for our health. The way we are attuned to Neptune is especially important. People with Neptune strongly involved in planetary configurations often go to extremes of being amazingly youthful or being prone to a wide range of illnesses.**

**In VA we are relentless in looking at all of the information, openly admitting what is contradictory and we persevere in trying to resolve the contradictions. VA is more about a process for understanding astrology than the conclusions. The conclusions in the future are likely to change, but it is unlikely that the process will change for at least many hundreds of years. Our understanding**

**evolves and develops significantly every year.**

Let's look at the 35V chart of Wayne Gretzky. The configuration is extraordinary. Neptune is involved.

**5.** Questions from previous class:

(a) Rectifying chart based on personality and behavior of a person:

<https://youtu.be/b1-YogHce38> Paul McCartney

<https://youtu.be/8hsly29ntTY> Taylor Swift

(b) Set computer time to be updated. Search for "time settings" and set to automatic.

(c) What does 197 Vibe mean? It is a prime number. A person has almost every planet in 101 Vibe. What does it mean?

(d) I have a midpoint structure in the natal chart with a 39' orb, but it does not show up in Harmonic Patterns Listing # 1.

**6.** Start planetary pair Sun-Pluto. We will do only the rest of Sun and the Moon today to spread this out.
