

# 5th Course, 6th Class

Thursday, April 13

Announcement: 15-minute consultations at the next VA Conference.

(Also, if you are interested in research and have lots of time to do it, speaking at future VA Conferences.)

1. Review schedule of classes.
2. Last week we picked a date for Angela and her business partner to have a kind of opening event for their business:

The first rule for picking an event: the event is typically specific. Find out what it is in the person's chart that makes them want to have this event!!!!!!!!!!!!

Second rule: Find transits that activate it. Transits are especially important because they will also be the chart of the event, so the connection of the person to the transits is also the compatibility with the event that you are picking.

3. Mundane Forecasting and practice forecasting.
