

REMINDER: I am bombarding you with information.

Why?

So that you can have a feeling for the fundamental tools that you will be working with.

If you do not follow every detail, it is OK. Your understanding will gradually deepen and as we go over the ideas again and again, they will become natural for you.

Also, you can hand in assignments late.

One week off; no classes June 9 can help with catching up.

The basic tools: Planet meanings and Vibrations!

Some of you have succeeded in making youtube videos!

Congratulations! Once you have something to share, you make it Public instead of Unlisted and the whole world has access to your video.

Calling up charts and setting the default wheel in Sirius: Let's go over this.

Then let's talk about the interpretation of the aspects in your charts. Note: A cool counseling technique: Ask questions about what you suspect may be happening and then the conversation evolves into brainstorming about decisions, solutions and plans.

Aspects are driving forces! The behavior and personality of the person is an expression of the driving forces!!!

Sun-Uranus: A need to be in the moment, to be in a spontaneous, electrically charged, liberated from social conventions. A need to take the risk of making mistakes while improvising. Tension builds up with an aspect like this is restrained by not allowing for some sloppiness and mistakes while learning to get good at improvising. Conservative and controlling upbringing can lead to problems but works OK if the person has an open and responsive personality and is not too shy and quiet.

IMPORTANT: The energy needs to be released periodically!!! These are not personality characteristics. They are energy dynamics that need periodic expression! You do not do them all of the time! "Personality" is a construct and refers to habitual demeanor, expressions, etc. In the astrology chart we see the energy dynamics that combined with life experiences and decisions forms personality!

Astrology does not tell us everything! It is like a genetic code and tells us what higher dimension forces are driving the person. We do not know what the person is like but we know the therapy and the life direction to set them on a path that works for them!!!!!!!!!!

ALSO IMPORTANT: One aspect, even with a small orb, is NOT the most important thing in your life!!! I gave this homework to you so you can start thinking about how planetary meanings work. However, for some of you this strong aspect is not one of the most conspicuous things in your life.

Venus-Saturn: A need for something sincere and that cuts

beneath glamour and frivolity and to trust in what you are attracted to.

Venus-Saturn: falls in love with a guy who calls his mom on her birthday (for example)

Venus-Jupiter: falls in love with a guy who makes her laugh (for example)

However, if Venus-Saturn is in a strong aspect in your natal chart or 8V chart, it is not necessarily dominating. IT IS NOT MISSING IN YOUR LIFE. IT IS NOT WEAK. That is all we know.

Questions:

Do I see cooking in Angela's chart?

What makes it easier to interpret?

1. Think about what the planet actually does!
2. Think about how the planets combine in the vibration they are in.

8-Vibration is an inner drive.

Natal chart is rather superficial except when the orbs are less than 1 degree. Less than half a degree it can become conspicuous.

3 planets or more are most important.

What are typical expressions of the energy,
Personality traits, behaviors, and archetypal stories that are

common.

In the 9V chart, 2 planets that are:
0 40 80 120 or 160 degrees apart (conj, 1/9 2/9 3/9 4/9) becomes
conjunct.
20 60 100 140 (1/18 3/18 5/18) become oppositions

The aspect in the harmonic chart is the harmonic times the denominator of the aspect in the natal chart.

Video 1, Harmonic Charts, Part 1:

Note: In this video I use the more common term "harmonic" rather than "vibration".

1. Fractions of a circle are important. 5ths, 7ths, 9ths etc.
2. 1/7, 2/7 and 3/7 aspects are similar in meaning. The meaning is not identical but it is very simple.
3. The harmonic chart gives us a visualization of the aspects so we can see what the orbs are AND we can see aspects that are related to each other.
4. Some history for the idea of "minor aspects" (Kepler, Lilly, Addey, Vibrational Astrology). There are critics of minor aspects.

ALSO: Ptolemy wrote about the music of the spheres and the way that there might be celestial vibrations! But, as far as we know, he did not discuss minor aspects.

5. The denominator is more important than the numerator. The denominator is the harmonic!

IMPORTANT:

6. Quintiles ($1/5$ and $2/5$ aspects) turn into conjunctions in the harmonic chart.

7. Do you see how the Ven-Jup-Ura configuration in the natal chart becomes a conjunction in the 5-Vibration chart?

8. All harmonic charts have the same orbs.

9. A conjunction in the 5V chart is a $0/5$, $1/5$ or $2/5$ aspect. $0/5 =$ conjunction.

10. Squares in the 5V chart (and any vibrational chart) are just like squares in the natal chart. They are motivating.

11. Square in 5-Vibration. The need to play and explore. The challenge of playing and exploring. This can be sports, entertainment, puzzles and people who just love to learn and explore. They love challenging their child-like curiosity.

12. A square in the 5V chart is a $0/20$, $1/20$, $2/20$, $3/20$, $4/20$, $5/20$, $6/20$, $7/20$, $8/20$, or $9/20$ aspect. Some of these reduce to lower fractions.

Video 2, Harmonic Charts, Part 2:

Practice looking at an aspect in the vibrational chart and seeing what aspect it is in the natal chart.

Multiply the denominator of the aspect times the vibration to get the vibration of the aspect (if the aspect does not reduce to a lower fraction). For example a square in the 5V chart is $5 \times 4 = 20$ vibration.

Everything in the 5V chart is about 5V only!

How to put on the aspect line in the Vibrational Chart what the aspect is in the natal chart.

Video 3, Harmonic Charts, Part 3:

How a harmonic chart is calculated manually: just multiply the position of the planet by the number of the harmonic. This is optional and is not important. I gave this video as homework for those of you who want to know.

You can also think of a harmonic chart as little zodiacs going around the wheel.

You can thin of a harmonic chart in different ways and these different ways of thinking of a harmonic chart are the same. The only thing that is very important is just to know how we see aspects as described in the first video.

We do not interpret planets in houses in the Vibrational Chart.

They might be important but we have not yet confirmed that they work.

The zodiac sign of some harmonic charts has an effect but we do not yet know how to consistently incorporate this into our astrological consultations. This is something that research in the future will help with.

Also, how big is a zodiac in 9-Vibration?

In 12-Vibration?

In 30-Vibration?

30-Vibration signs might be a basis for degree meanings! Degree meanings is an ancient idea and is popular today with what are called Sabian Symbols.

Video 4, Harmonic Charts, Part 4:

How aspects look in different vibrations. This video is optional. I won't go over this in class, but if you have questions about it, I can answer your questions.

Video 5, Harmonic Charts, Part 5:

Octave harmonics: 2 4 8 16 32 etc. are the driving force

Vibrations 3 6 12 24: 3 and 6 are smooth, 12 etc. are resources available to you.

Vibrations above 16 are not as personal; they are not about your personal needs. They are more interpersonal or are about an interest in ideas, ethics, aesthetics, which are not things important for your personal comfort or other benefit to just you as an individual. Vibrations above 16 are more participatory in a larger sphere of activity.

Doubling any vibration results in a similar effect.

Harmonics 5 7, 9 are fundamental qualities that a child needs to develop.

Second-order vibrations are very important!!! For example, 5x7, 5x9 and 7x9

Video 6, Harmonic Charts, Part 6:

This is an excellent video. You may want to watch it more than one time, and perhaps watch it again in a few weeks. There is a lot of review while getting more comfortable about how to interpret orbs of aspects.

Video 7, Harmonic Charts, Part 7:

This video is too advanced and gets into some subtle issues. I think that I should not have assigned this video for homework.

Video 8, Sirius software harmonic astrology features

This video covers some different features. We will get to what is presented in this video in future classes. Its not critical for us right now. At the end a little bit about some of the advanced research projects is described.
