4. The easy way to interpret continued!!!!

Build the sentence with keywords that are always correct.
Then try to feel it and sometimes an image can come to

mind of how all of this comes together. Remember that interpretations are usually very specific.

Two observations from your homework:

(a) Focus on the planets involved and what aspects have the smallest orbs.

(b) If there is an aspect that is nearly exact, go to the overtone to understand it.

Square: Double the vibe -> Opposition

Trine: Triple the vibe -> Conjunction

Sextile: Triple the vibe -> Opposition

When two planets are conjunct or opposition with a very small orb, look at the midpoint structures.

When someone has a strong Mercury and Mars in their astrological chart, they might always feel like they need to understand how things work. They might not be comfortable just trusting that things will be okay without knowing the details behind it. They could be like an eternal student, always learning and studying to gain a deeper understanding. For example, they might want to know how their phone or computer works or even how the human body functions. People with strong Mercury and Mars might also enjoy solving problems and puzzles, as it gives them the opportunity to use their analytical skills. Overall, having strong Mercury and Mars means that you have a strong desire to understand the world around you and how it functions.
