

5th Course, 2nd class

Thursday, Feb 9

Last week: the first forecast method: Transits using the TimeLine format.

This week: 4-planet patterns in detail.

And a question: What are we really doing when we overlay two charts, such as transit-to-natal OR in compatibility?

The three 4-planet patterns:

1. Same phase angle
2. Composite. Same angle but out of phase.
3. Midpoint-to-midpoint

1. Same Phase Angle: the planets are in the same phase, i.e. both are waxing, or both are waning. Also the angle of his Sun to her Sun is the same as the angle of his Moon to her Moon, which also occurs in the Midpt-to-Midpt alignment.

2. Composite

3. Midpoint-to-Midpoint: the angles between the planets are the

same, just as they are in the composite chart alignment, and also the angle of his Sun to her Sun is the same as the angle from his Moon to her Moon.

Two emails I just glanced at:

1. The first video in last week's homework: a lot of material and perhaps overwhelming.
2. Can you do a TimeLine to a Vibrational chart?
