Minor note: some videos may state that they are a lesson number in an introductory course but I am using the videos in a different order so this number does not apply to this course.

Make a 10-minute video (7 minutes to 15 minutes only!) on something you notice in your birth chart using an idea (or ideas) from one or more of these videos. You can present a way of thinking about what the astrology chart tells you or does not tell you, a perspective on it in a broader philosophical sense and/or specific interpretations. (Use Zoom or anything else; mp4 format is good). You can do this in a teaching mode if you like and upload it to your youtube channel if you would like. In this case you can send me a link to the video.

I googled free video recording programs and I like the Flashback Express Video Recording program very much and I think you will like it too. It is a Windows program and here is the link to install it:

<https://www.flashbackrecorder.com/express/>

I will show in class how to use the software. It records and automatically saves the recording as a mp4 file. You can make a youtube account and upload your video and email me a link. If your video is good, make it Public and others can watch it! If it is not something you want to make Public leave it as Unlisted. I will show all this in the first class.
